

Large Defrosters

Features include:

- Unique AFOS horizontal reversing airflow system ensures rapid and consistent thawing maximizing yield and minimizing waste
- Siemens S7 HMI touch-screen technology maintains integrity of product, holding color and protein
- Electronic humidity and temperature control
- Air/water atomizing system drastically reduces water and energy costs
- Automatic sanitizing system
- Perfect solution for high volume defrosting of all fish and meat products
- Capacity from 1,500 to 13,500 kg
